Powered by FME

Contractor Portal

Construction projects present significant risks to underground utilities, including water, gas, electricity, and fibre optic networks. Without proper planning and infrastructure data, accidental damage can lead to costly repairs, service disruptions, and serious safety hazards.

Powered by FME, the Click Before You Dig Portal is a modern, web based solution that empowers contractors and the public to seamlessly request and access critical infrastructure data. This automated, self-service platform streamlines the process of identifying underground utilities, ensuring safe, efficient, and fully compliant excavation activities.

Solution Highlights:

- Optimised for All Devices
- User Friendly, Map Focused User Interface
- Automated, Low Code Solution with Configurable Responses

Core Advantages:

- Improved Customer Experience
- Untangle Staff from Manual Data Processing
- Deploy Anywhere – On-Premise, Cloud or Hybrid
